Keynote Speakers

The TriHealth Center for Simulation and Education is proud to present two outstanding speakers for TraumaScope 2013. Please help us to welcome;

Lessons learned from the Boston Marathon Bombing

Jerrilyn Jones, MD began her fellowship with Boston EMS in July 2012 after completing her Emergency Medicine residency at Boston Medical Center.

A graduate of Harvard Medical School and Howard University, Dr. Jones spent 4 years serving the US Air Force as a flight surgeon and Chief of Aerospace Medicine. She is a veteran of Operation Enduring Freedom, having served in Afghanistan in 2006.

Dr. Jones is currently an Attending Physician at Boston University/Boston Medical Center. She is a member of the American College of Emergency Physicians and the National Association of EMS Physician, among other organizations.

Street Drugs in Cincinnati

Dr. Jan Scaglione is a Pharmacist and board-certified Clinical Toxicologist at the Cincinnati Children’s Hospital Medical Center’s Drug and Poison Information Center.

She has 19 years of toxicology expertise with 13 years specific to substance abuse issues. She has Bachelor’s degrees in Biology and Medical Technology from Wright State University, and Bachelor and Doctorate degrees in Pharmacy from the University of Cincinnati.

Dr. Scaglione has written and presented numerous toxicology and substance abuse subject matter on local, state, national, and international levels.

About TraumaScope 2013
TriHealth Center for Simulation and Education welcomes you to TraumaScope 2013.

The purpose of this symposium is to have locally and nationally renowned experts address current topics and trends in the management of the trauma and critical care patient.

General Objectives for TraumaScope 2013
- Identify and discuss safety issues, injury patterns & elements involved with MCI incidents.
- Identify and discuss the current and evolving use of capnography in the prehospital care setting.
- Identify and practice comprehensive tracheotomy care for the injured and ill patient.
- Discuss and practice accurate drug and fluid resuscitation calculations for the injured/ill pediatric patient.
- Identify and discuss the injury patterns from blast injuries and their current treatments.
- Discuss and identify the current trends and treatments for illegal street drugs.
